

The Waste Electronic and Electrical Equipment (WEEE) Directive (2012/19/EU)

WEEE Directive Mark

Electrical and electronic equipment (EEE) contains materials, components and substances that may be hazardous. This can present a risk to human health and the environment when this waste is not handled correctly.

Equipment marked with the crossed-out wheeled bin is electrical and electronic equipment. The crossed-out wheeled bin symbol indicates that waste electrical and electronic equipment should not be discarded together with unseparated municipal waste, but must be collected separately. As a consumer, you have an important role in recycling this equipment and contributing to the protection of the environment.

Powersolve Electronics Limited is registered as a WEEE Producer with the UK Environment Agency and our WEEE registration number is: WEE/BJ1251ZR.

Powersolve Electronics Limited meets its obligation to the WEEE Directive in the UK through membership of a Government Approved Producer Compliance Scheme (Accerio) and by providing its customers with a Recycling Programme for end of life products.

When a product reaches its end of life, contact us at sales@powersolve.co.uk to arrange its recycling. Powersolve Electronics Limited will work with you to arrange for the recycling of the product.
